

PSA

My Public Service is about the dangers of cyberbullying. How social networking sites such as Facebook and Myspace can contribute to it. I used the song "My December" by Linkin Park. It resembles how people want to call out for help and would do anything for it. And how people should know how real cyber bullying is. ~~is~~

In the video I used the deaths of real teenagers who took their lives from cyber torture. Seeing is believing, ~~is~~ if I put real people in the video, everyone would see it's a real problem.

I also used the song "Heartbreak Warfare" by John Mayer. It showed that if you want release from cyberbullying all you have to do is seek help from others. I used pictures of people comforting each other and smiling to show that if someone was being cyberbullied that they were not alone and there are people who will listen.
